In the same period, the after-tax profit of the parent company is 193.355 billion VND, or 77.03% of targeted after-tax profit in 2015 (251 billion VND).

2. FIT share transfers to HSX

On 19th August 2015, FIT share is officially listed in HOSE after being listed in HNX for 2 years. For F.I.T, the exchange transfer is expected to help the company get more interest from investors, especially foreign ones, in term of funding and business cooperation. In addition, the FIT share is promising to be soon included in ETF when being listed in HOSE.

3. F.I.T Chairman: “FIT stock is oversold”

Since the day of being listed in HOSE, FIT stock of F.I.T has declined sharply in a row and its board of directors gave a timely feedback to investors.

According to Mr. PhanTrung Phuong – Chairman of F.I.T, the oversold is caused entirely by market factors. In the context of stock market shrinking, many investors are under pressure, so it is possible for them to sell good-liquidity stocks with small decline to balance their portfolios. Mr. Phuong affirmed that the decline is reverse to F.I.T’s business- manufacturing status.
